

The Malvern Wells Teaching and Learning Policy to be implemented explicitly by all staff: -

- All staff must meet the appropriate Teachers Standards for their grade and experience.
- All staff must promote and embody the vision and values of our school, they define our culture.
- Curriculum planning must provide pupils with a balanced timetable which ensures that their full curriculum entitlement is met through project-based learning
- All lessons to be appropriately planned, sequenced, and matched to the individual needs of all pupils.
- Teaching must engage and inspire pupils through a range of strategies and resources which provides them with clarity in their learning, with clear formative assessment, feedback and guidance on next steps.
- Learning environments must support and reflect the high-quality learning experiences on offer.

Where teaching and learning is found to not match these expectations, staff will be appropriately supported through CPD / training and Appraisal.
